I am a first class Information Technology degree graduate from Richfield Graduate Institute of Technology, specializing in programming. I come from a solid technical background with a strong interest in business and a passion towards strategy. My area of focus and interest varies from web and software development to project management.

I believe my academic background, business knowledge and industry experiences have provided me with the credentials needed to thrive as a developer. Prior to Ben It Solutions, I worked as a Junior Developer at Tobb Technologies. I gained solid research, analytical and problem solving skills while working there. My background in generating innovative ideas and strategies to improve processes has provided me with a deeper understanding of IT problems that companies encounter in their daily operations. Moreover, because of my work experience, I fully understand how important it is to have great team dynamics in today's multi-disciplinary business environment. To date, my experience as an IT professional has been extremely educational.

It is through strategy consulting that I can use my analytical aptitude and creative problem solving skills to their fullest. I strongly believe that consulting is a discipline that will force me to view problems not only from the client's standpoint but also from a marketplace best practices and "think out of the box" point of views. I would appreciate the opportunity to interview with your company.

Please find enclosed my resume for your review. I can be reached via email at kingsilas45@gmail.com or WhatsApp and calls at +27688647172. I enthusiastically look forward to hearing from you. Thank you for your time and consideration.

Sincerely
Sauleni Silas Chisale
